PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8907

SESSION NUMBER: 2

DATE OF SESSION: 890222

DATE OF REPORT: 890224

START: 1400

END: 1445

METHODOLOGY: CRV

VIEWER IDENTIFIER: 003

1. (S/NF/SK) MISSION: Access and describe the target building.
2. (S/NF/SK) VIEWER TASKING: Coordinates.
3. (S/NF/SK) COMMENTS: 003 spent the first half of the session off target. He then took a break and the session was resumed from stage 1. 003 then appeared to get on target. Next session will be spent describing the "building of interest." (cue to be used).
4. EVALUATION:

HANDLE VIA SKEET CHANNELS ONLY
SPECIAL ACCESS REQUIRED

~~SECRET~~/NOFORN

CLASSIFIED BY: DIA (DT)
DECLASSIFY ON: OADR

ok —
— need further w/ appreciation of (awesome) dimensional aspects of the building.
— Ultimate goal here is to determine the nature and scope of a developmental activity, if any!

First portion of session described a large object and a structure of unusual dimensions, but may have been influenced by ADL/D or accessing a different site.

Actual reported site involved a complex compound surrounded by a fence in the lee of a terrain feature in an area that is dark alot. The area is patrolled, is isolated, cold, maybe snowy, with pools of light here and there. There is a sense that this place is official, important, highly secure, well staffed and maintained, very active, and is very serious/sober/professional. A military connection of some sort is present--not specifically army/navy/air force, but like a different branch altogether. The system is not like the US'. There is a sense of a roof with miscellaneous items on its top, and a structure that involves operations, thinking, putting together, arranging, directing, controlling, A/S "like" the idea of some sort of "nerve center." There was a further impression of some sort of object that was curving and hollow and served in conjunction with another similar object and opposing halves to join two long cylindrical sections of something together (see sketches pp. 10,11). Object are pressure/force/stress and heat resistant.

metal

inside

Subj not a device - bigger - like a structural element
that does something. Made of lots of metal pieces.
Lots of long thin rounded metal pieces that tie
it all together. Seem to be horizontally &
longitudinally oriented. Central "core" sort of a
piece throughout the whole thing. Design
for when shearing forces to be applied & to

Approved For Release 2000/08/08 : CIA-RDP96-00789R003500190001-3
Report further, comprehensive, extension type force
as well as conditions and measurement changes

Engineering

Als "like" a strain gage Mars length to measure deformation with respect to an absolute sat of scale.

Structure

So 1/2 time that structure is neither largest nor smallest in vicinity - medium in between. Something different about dimensions - it's not just regular as square or rectangular sort of bldg.

Seems there's something bound about it, though not necessarily apparent externally more than one floor. Some part stills out
